

Tamana Muhseny

Auburn • (253) 527 - 9890 • muhsenyt@spu.edu

PROJECT EXPERIENCE

Team Member

(Mar 2023 – June 2024)

Falcon Racing, Baja SAE (Seattle, WA)

- Worked with sensors (e.g., temperature, pressure, accelerometers) for data acquisition and real-time performance monitoring
- Diagnosed an overheating issue with the CVT system during the Baja SAE competition, and proposed a temperature sensor system, to streamline troubleshooting.

Embedded Robotics System Senior Design Project

(Sept 2024 – June 2025)

Seattle Pacific University(Seattle, WA)

- Developed an ultrasonic sensor-based obstacle avoidance system using Arduino Mega and ESP32 for a remote-controlled heavy-lifting robot.
- Designed a custom PCB to provide a structured and organized connection hub for multiple microcontrollers, ensuring efficient wiring and power distribution.

AWE in the Context of Disaster Relief Situations Research Project (Jan 2025 – Mar 2025)

Seattle Pacific University (Seattle, WA)

- Researched a hybrid AWE + diesel microgrid to power critical infrastructure post-disaster focusing on Guayama, Puerto Rico, a hurricane-prone region.

EDUCATION

Bachelor of Science in Electrical Engineering

June 2026

Seattle Pacific University(Seattle, WA)

- **Relevant Courses:** Circuits sequence, Signals & System, Electronics sequence, Microcontrollers, Senior Design (Project: Embedded Robotics System)
- **GPA:** 2.67

SKILLS AND QUALIFICATIONS

- **Programming Languages:** C++ and Python
- **Software/Technologies:** SolidWorks Certification, Multisim, Altium Designer
- **Test/Measurement Equipment:** Oscilloscope, Multimeter, Bench Power Supply

WORK EXPERIENCE

Associate/Clerk

(Aug 2025 – Present)

Fred Meyer (Auburn, WA)

- Accurate and efficient point-of-sale (POS) transactions.
- Provide daily customer assistance to locate products efficiently.

Learning Assistant

(Sept 2023 – June 2025)

Seattle Pacific University (Seattle, WA)

- Helped student with in-class activities and homework.
- Worked alongside professors and coworkers to plan weekly lectures.
